|--------------------|----------------|
| power:             | kW             |
| operation voltage: | 380 V          |
| frequency:         | 50 Hz          |
| dimensions:        | 230x140x100 cm |
| weigh:             | 1000 kg        |

## Description

CAN TRIMMING & THREAD ROLLING MACHINE T2071M

Range of Application:

Can diameter: max. 90 mm

Trimmed length: 100-300 mm

Production speed: max. 40 per min.

Connected load approx: 3 kW

Technical Features:

This machine was especially developed and used for machining the neck of aluminium transport bottles.

For this purpose, the hollow bodies are horizontally and cycle-controlled fed one after the other into chuck holders.

The process is made in two working stations with appropriate tooling equipment.

For the in-and outfeed of the hollow bodies, appropriate equipment is available, however, not mounted to the machine and not adjusted to a certain workpiece size.

Obviously, the basic equipment of the machine is suitable for another use.

A mechanical and electrical check is recommended and all processing functions must be re-adjusted.

Furthermore the appropriate tools are necessary for a future use.

ALL PARAMETERS ARE WITHOUT ENGAGEMENT FROM OUR SIDE
