

Trimming and brushing machine for aluminum aerosol cans

TUBETTIFICIO LIGURE (GUZZI) - RDG

Information

Machine no.:	3200-D14
Make:	TUBETTIFICIO LIGURE (GUZZI)
Type:	RDG
Category:	machines for the manufacturing of aluminum aerosol cans
Year / Condition:	xx/Gebraucht
Control unit:	
Country of origin:	Germany
Freight basis:	ex warehouse
Item location:	Malsch
Delivery time:	on request/ t.b.a.
Link to website:	https://industrie-kontor.com/en/detailview/3200-d14

Details

power:	kW
operation voltage:	380 V
frequency:	50 Hz
dimensions:	230x140x100 cm
weigh:	1000 kg

Description

CAN TRIMMING & THREAD ROLLING MACHINE T2071M

Range of Application:

Can diameter: max. 90 mm

Trimmed length: 100-300 mm

Production speed: max. 40 per min.

Connected load approx: 3 kW

Technical Features:

This machine was especially developed and used for machining the neck of aluminium transport bottles.

For this purpose, the hollow bodies are horizontally and cycle-controlled fed one after the other into chuck holders.

The process is made in two working stations with appropriate tooling equipment.

For the in-and outfeed of the hollow bodies, appropriate equipment is available, however, not mounted to the machine and not adjusted to a certain workpiece size.

Obviously, the basic equipment of the machine is suitable for another use.

A mechanical and electrical check is recommended and all processing functions must be re-adjusted.

Furthermore the appropriate tools are necessary for a future use.

ALL PARAMETERS ARE WITHOUT ENGAGEMENT FROM OUR SIDE
